

PRESSURE TESTING

HYDROSTATIC TEST VALVE (HTV) ASSEMBLY

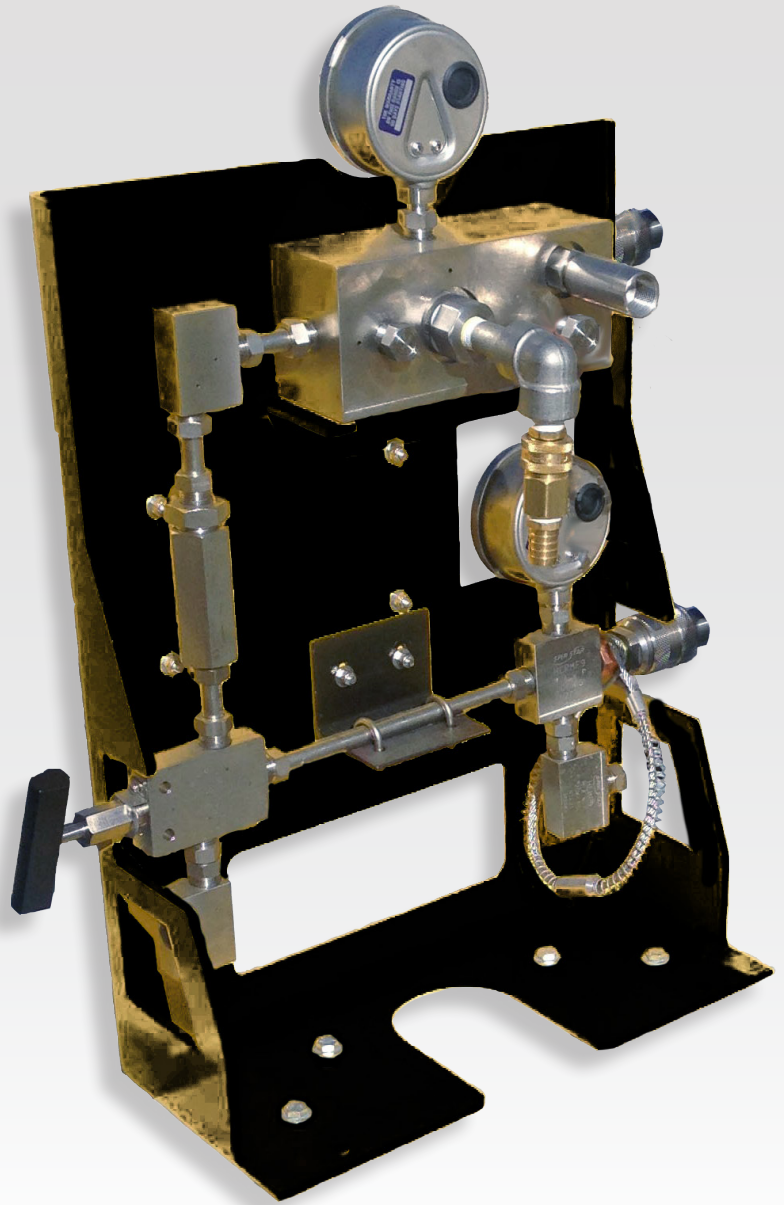

The Jetstream Hydrostatic Test Valve (HTV) is used for pressure testing of pipes or other vessels. This valve allows one operator to control the filling, pressurizing and pressure bleeding from a central location. Included in this valve is the hand lever, which eliminates the need to “feather” the clutch on the waterblasting unit.

KEY FEATURES

- Two-minute field replaceable cartridge design for minimal downtime
- Hand controls for high pressure filling and bleeding, without the use of a wrench
- Stainless steel pressure bearing components
- Internal ball check valve
- Adapts to various data acquisition apparatus

INDUSTRY APPLICATIONS

- Pressure testing
